

Creating an Effective Testing Solution Ecosystem

As the pandemic presents challenges and the OSHA ETS has been put to rest, employers around the globe are looking for solutions to manage an effective testing strategy, safety of employees, and maintaining business continuity. Infinite Genomics and our ecosystem consortium partners provide an elite team of experience to complete a comprehensive turnkey model for large corporations both nationally and internationally. This ecosystem of services can be customized to achieve the goals and objectives of your organization to ensure you can stay focused on your mission.

About Infinite Genomics, LLC

Infinite Genomics is a CLIA state-of-the-art high-throughput molecular diagnostic testing laboratory which works closely with reputable logistics and staffing companies and is a reliable health and safety solutions provider that is trusted by schools, Fortune 500 corporations, major film production companies, large entertainment venues, and more. Infinite Genomics works closely with each client to customize and deliver excellent customer service. Infinite Genomics, an Arkansas based company, serves clients nationally with its high accuracy and fast turnaround times of 24-hours or less.

About Curtis Stout Company

Infinite Genomics has been very fortunate to partner with Curtis Stout Company to offer PPE supplies to all laboratory clients for full offering of top-of-the-line gloves, masks, gowns, shoe covers, face shields, and any other laboratory testing PPE supplies that are needed. Curtis Stout Company, headquartered in Little Rock, Arkansas, for over 70 years has been the premier supplier of electrical, electronics, energy solutions, and health & safety solutions.

About KBOS Consultants

KBOS Consultants, an FDA registered company and exclusive partner with Infinite Genomics, is a premier supplier of viral transport medium (VTM) kits, lateral flow rapid antigen kits, swabs, and saliva adapters in the medical industry.

About Med USA Healthcare, LLC

Med USA is a national provider of outsourced staffing and COVID-19 testing services. All our projects beyond our inception have come through organic growth and customer referrals. These satisfied customers and stakeholders have caused our project footprint to snowball to the size and scope it is today, across the Pacific and the entire continental U.S. Med USA employs experienced and highly trained professionals focusing on emergency response management and delivering high-quality healthcare solutions. This footprint demonstrates our capacity to operate as a global staffing and COVID-19 testing service provider. Our personalized services, experience, and user-friendly, innovative technologies keep Med USA at the forefront of emergency response and health and wellness services.

COVID-19 Testing Solutions

Managing the challenges of the safety of employees during the pandemic can be overwhelming. Infinite Genomics and our ecosystem partner consortium can collaborate with your leadership and operations team to develop an effective testing program. You will have access to our proven Laboratory Information System. This access will allow you to tailor the system to meet your needs, including:

- Organizing individuals by department, zone, and more
- Manage compliance schedules
- Track test status and results
- Set schedules with calendar views
- Collect and monitor daily symptom questionnaires to get ahead of potential outbreaks
- Expert Medical oversight:
 - Dr. Ben de Miranda, Medical Director, Infinite Genomics, has served as Medical Director for clinics, corporations, nursing homes, and home health agencies. As a practicing family physician, Dr. de Miranda can also provide innovative healthcare programs to benefit overall company wellness

Offerings Include (COMPLETE Turnkey Process):

- Customized Rapid Antigen Test and PCR options performed by a CLIA molecular diagnostic laboratory with a 24-hour turnaround time
- Staffing and logistics system available to optimize your current operational resources
- Routine scheduling to ensure minimal disruption
- Vaccine Information System (Vaccine verification in moments)
- PPE equipment for all staffing needs for testing services
- Complete data management software for ease of reporting purposes and complete tracking of all employees in the testing program for both Rapid Antigen POC and PCR tests

Mitigation Solutions:

- Risk mitigation for OSHA compliance
- Reduce potential outbreaks from vaccinated employees due to Variants Being Monitored (VBM) and Variants of Concern (VOC). Vaccination does not eliminate risk of virus transmission
- Enhances business continuity measures
- COVID/Flu A&B (PCR) test available for symptomatic employees
